Disclaimer: The NetDISC includes a series of self-report evaluations used to identify common behavioral health disorders in children and adolescents. **The NetDISC is not a substitute for a thorough clinical evaluation. Only a licensed clinician can make an actual diagnosis.** The youth may be at risk of having one or more of the possible diagnoses listed here; alternatively there may be other conditions causing his or her symptoms that are not listed here. Regardless of the results of this survey, see a licensed clinician if you have questions or think the youth might need help. Even if this evaluation was requested by a clinician, your report may never be seen or reviewed by a clinician. **If you are experiencing suicidal thoughts or may be experiencing a medical emergency, call 911 or go to the nearest hospital emergency department.**
